

Digital Wood Moisture Meter EMT01

Features:

- This instrument is a conductivity moisture meter specifically designed for the wood industry. - The instrument has four calibration scales. enabling the user to take accurate moisture measurements in 50 wood species. Moisture measurements can be taken using the integral pin electrodes. - This meter is shipped fully tested and calibrated and. with proper use. will provide years of reliable service. - Use on wood. paper. cardboard. etc. - Memory contains 4 wood groups with calibrations for approximately 50 species of wood. - Strong and durable. suitable for variety of special occasions. - Auto power off conserves battery energy. - Data Hold function. - Displays Wood Moisture in LCD. - Built-in battery check&'low battery icon display. - Complete with protective cap and carrying case.
- Accuracy up to 0.5%
- Display: Large LCD characters display
- Range: Wood: 0~99.9%
- Accuracy: 0.5%
- Electrode pins: Integrated
- Power Supply: 1 X 9V 6F22 battery (not include in the package according to shipment request)
- Operating Temperature: 0 to 40 C (32 to 104 F)
